Our mission, to prevent and cure diabetes and improve the lives of all people affected by diabetes, can be seen in everything we do. Through your support, the American Diabetes Association is able to provide valuable programs and life-saving resources to the nearly 26 million Americans living with diabetes, the 79 million at risk for developing the disease, their families and health care professionals. See how your contributions made a difference and helped us advance our mission in 2012.
